HEALTH BIOTECH LIMITED

Health Biotech Limited (HBL) is a research and development based pharmaceutical company, producing quality, affordable generic and innovative medicines. HBL, was incorporated under the Companies Act, 1956 in April 2001. The corporate office is situated in Chandigarh "The City Beautiful"

State of the art manufacturing facility is located at the foot hills of Himalayas at Baddi with the built up area of 140,000 sq feet. The facility is WHO-GMP, ISO 9001-2008 certified and adhere to MHRA norms. Latest automatic tunnel system for sterile injectable and pre-filled syringes further adds technology advancements in the facility.

WE MANUFACTURE FINISHED PHARMACEUTICAL FORMULATIONS IN THE FOLLOWING CATEGORIES & FORMS:

OUR MISSION

- ▶ Is to provide Quality pharmaceuticals which could reach the society far and wide both in the Domestic and International markets.

OUR VISION

- ▶ Is to provide affordable healthcare to one and all. The endeavour is to be a focused and one of the largest finished pharmaceutical injectable technology and R&D based manufacturer in Asia.

FACILITY I

- ▶ A State-of-the-art ultra modern Injectable finished pharmaceutical manufacturing having in place the latest automatic tunnel system, lyophilization to make sterile injectables and pre-filled syringes. Automatic fill- form and seal facility has also been added as part of our manufacturing facility. Heating Ventilation Air Conditioning (HVAC) and cold room chains are in place; including hygiene standards suitable to manufacture sterile products and their storage.

We solicit international enquiries for 'Licensing-Out' of pharmaceutical injectable formulations providing complete technology coupled with facilitation of pilot batch manufacturing.

FACILITY II

- ▶ It is specially designed and equipped for manufacturing of high quality liquid syrups, dry syrups and redi-mix syrups that are used as expectorants, antacids, anti-diarrhoeals, antibiotics, tonics and vitamin supplements. These syrups are highly effective and safe to use.

The ointment manufacturing capabilities of this facility provide ideal tools for the pharmaceuticals and cosmetic industries for the production of ointments, creams, lotions, tooth pastes, shampoos and other emulsions. It is specially designed to take care of two critical factors which directly affect the quality of ointments/creams.

- Minimum man handling of ointment.
- Negligible vacuum drop during mixing/blending.

Manufacturing capacity ranges from 50 kg to 5000 kg. This facility also offers specialized equipment for production of sachets.

FACILITY III

- ▶ Rescuers Life Science Limited (RLSL), a recently acquired pharmaceutical unit to manufacture a vast variety of tablets and capsules including beta lactams. The facility has high speed machines and is also equipped with technology to blister in aluminium-aluminium foils for longer stability and elegant presentation.

Certificate of Good Manufacturing Practices

This one page certificate conforms to the format recommended by the World Health Organization [General Instructions and Explanatory Notes attached].

Certificate No. HFW-H [Drugs] 185/05

On the basis of the inspection carried out on 3rd & 4th July, 2017, we certify that the site indicated on this certificate complies with Good Manufacturing Practices for the dosage forms, categories and activities listed in Table I:

1. Names and Address of Site: **M/s Health Biotech Ltd.
Near Dream Hotel, Nalagarh Road,
Baddi, Distt. Solan [H.P.] India**

2. Manufacturer's License No: **MNB/06/445 & MB/05/158**

3. Table-I:

Dosage Form[s]	Category[ies]	Activity[ies]
Injectables (Dry)	Cephalosporin, Betalactum & Non Betalactum	Production, Packing & Quality Control
Injectables (Liquid)	General, Anticancer, Hormones	Production, Packing & Quality Control
Injectables (Lyophilized)	Anticancer & Hormones	Production, Packing & Quality Control
Sterile Ear and Eye Drops	General	Production, Packing & Quality Control
Liquid Orals & External Preparations	General	Production, Packing & Quality Control
Dry Syrup	Betalactum & Cephalosporin	Production, Packing & Quality Control

The responsibility for the quality of the individual batches of the pharmaceutical products manufactured through this process lies with the manufacturer.

FACILITY IV

Lyophilizer equipped facility is constructed according to EU cGMP norms. We seek approval from EMEA. Pre-audit of the design & layout is approved by one of the top associates in the business of obtaining EMEA cGMP.

QUALITY CONTROL

In-house Quality Control Laboratories, Analytical research laboratories, Microbiology and Pharmacology laboratories are fully equipped with Sophisticated instruments like High Performance Liquid Chromatography System, Gas Chromatography System, Ultraviolet Spectrophotometer, Infra-red Spectrophotometer and all the required other Laboratory instruments. Each product is tested for safety, quality & efficacy by team of well qualified personnel in place. Stringent and high quality standards are followed to ensure quality at each and every step of manufacturing.

QUALITY ASSURANCE

Quality Assurance Department, a fully autonomous functionality is in place to keep track of each activity, parameters and processes to achieve the quality goal in totality.

Quality of each medicinal product is assured by applying the latest TQM techniques by the QA team to release the products in the market to our distributors, partners and markets.

HEALTH BIOTECH RESEARCH CENTRE (HBRC)

Research and Development is an important aspect of our business strategies that provides long term competitive advantage. Dedicated teams of highly qualified scientists and professionals are engaged in the path breaking research thus generating IPR wealth. Research areas include Novel Drug Delivery Systems, Development of Clinically relevant and safe Fixed Dose Combinations, Analytical Method Development, Stability Studies, Pharmacology, Toxicology, Microbiology and Natural Product Research. A team of Regulatory professionals are involved in dossier preparations for Regulated and Semi Regulated markets.

We are in collaboration with various Government and Semi Government Research Institutes for various R & D projects.

CONTRACT MANUFACTURING SERVICES (CMS)

We undertake contract/toll manufacturing for various companies including Indian multinationals. This is due to the maintenance of high quality standards at the most affordable prices. Our client list is long, some of the known names are: Cipla, Lupin, Cadila, Unichem, Wockhardt, Piramal, Marksons, Intas, Hetero Drugs, Cytogen, Claris Life Sciences Limited, Flamingo and others.

INTERNATIONAL BUSINESS

We have our presence in nearly 30 countries across the globe with our products registered in Latin America, CIS, Middle East, South East Asia & Africa in the less regulated & semi regulated markets. With our high end products which are much in demand globally. We have an added advantage with our facility having been approved by Iraq MOH, Syria, Yemen and Nigeria

With our new facility aimed at acquiring EU GMP, PIS/S certification and a few upcoming marketing tie ups, we plan to enter the regulated markets like Europe with our impressive Injection range which has tremendous potential.

CMS BENEFITS

Product Quality

The tech savvy production team of HBL qualifies for maintenance of international standards of product quality and assaying. Our Modern hi-tech automatic manufacturing processes are available for manufacturing consistently high-quality products.

Cost Competitiveness

Health Biotech Limited experts expect that its pharmaceutical industry will quadruple over the next two years. We have deployed latest Automatic Tunnel Systems which is a capital intensive, quality & cost competitive process. Health biotech contributes to the availability of good medicinal products on national & international level by stimulating the development of innovative new medicines, by assisting pharmaceutical companies with approval procedures, by evaluating the safety, efficacy and quality of new medicines prior to authorization and by constantly monitoring them once they are on the market.

Delivery Schedule

With an intricate planning objective which involves control of incoming materials, maintenance of an operating schedule of the production line, determining the number of lines and shifts needed, the manpower required and the process yield, we ensure that seamless deliveries are affected to our partners for optimum market planning.

NOVEL DRUG DELIVERY SYSTEMS AT HBL

Various drug delivery and drug targeting systems are currently under development to improve the efficacy and safety profiles. Two important drug delivery technologies are :

- Nano particle based drug formulations
- Liposomal formulations

These technologies have greatly revolutionized the drug delivery field. The strength of drug delivery systems is their ability to alter the pharmacokinetics and bio distribution of the drug.

THE BENEFITS OF THESE NEW DRUG DELIVERY TECHNOLOGIES ARE :

- Improved Efficacy
- Minimum Drug Degradation and Loss
- Reduced Harmful Side Effects
- Increased Drug Bio Availability
- Targeted Delivery

NANO FORMULATIONS UNDER DEVELOPMENT :

- Anti Cancer Drugs • Antibiotics

LIPOSOMAL FORMULATIONS UNDER DEVELOPMENT :

- Amino Glycosides
- Doxorubicin
- Amphotericin B

THE EXPERTS IN LYOPHILIZATION (Cake Form Parenterals)

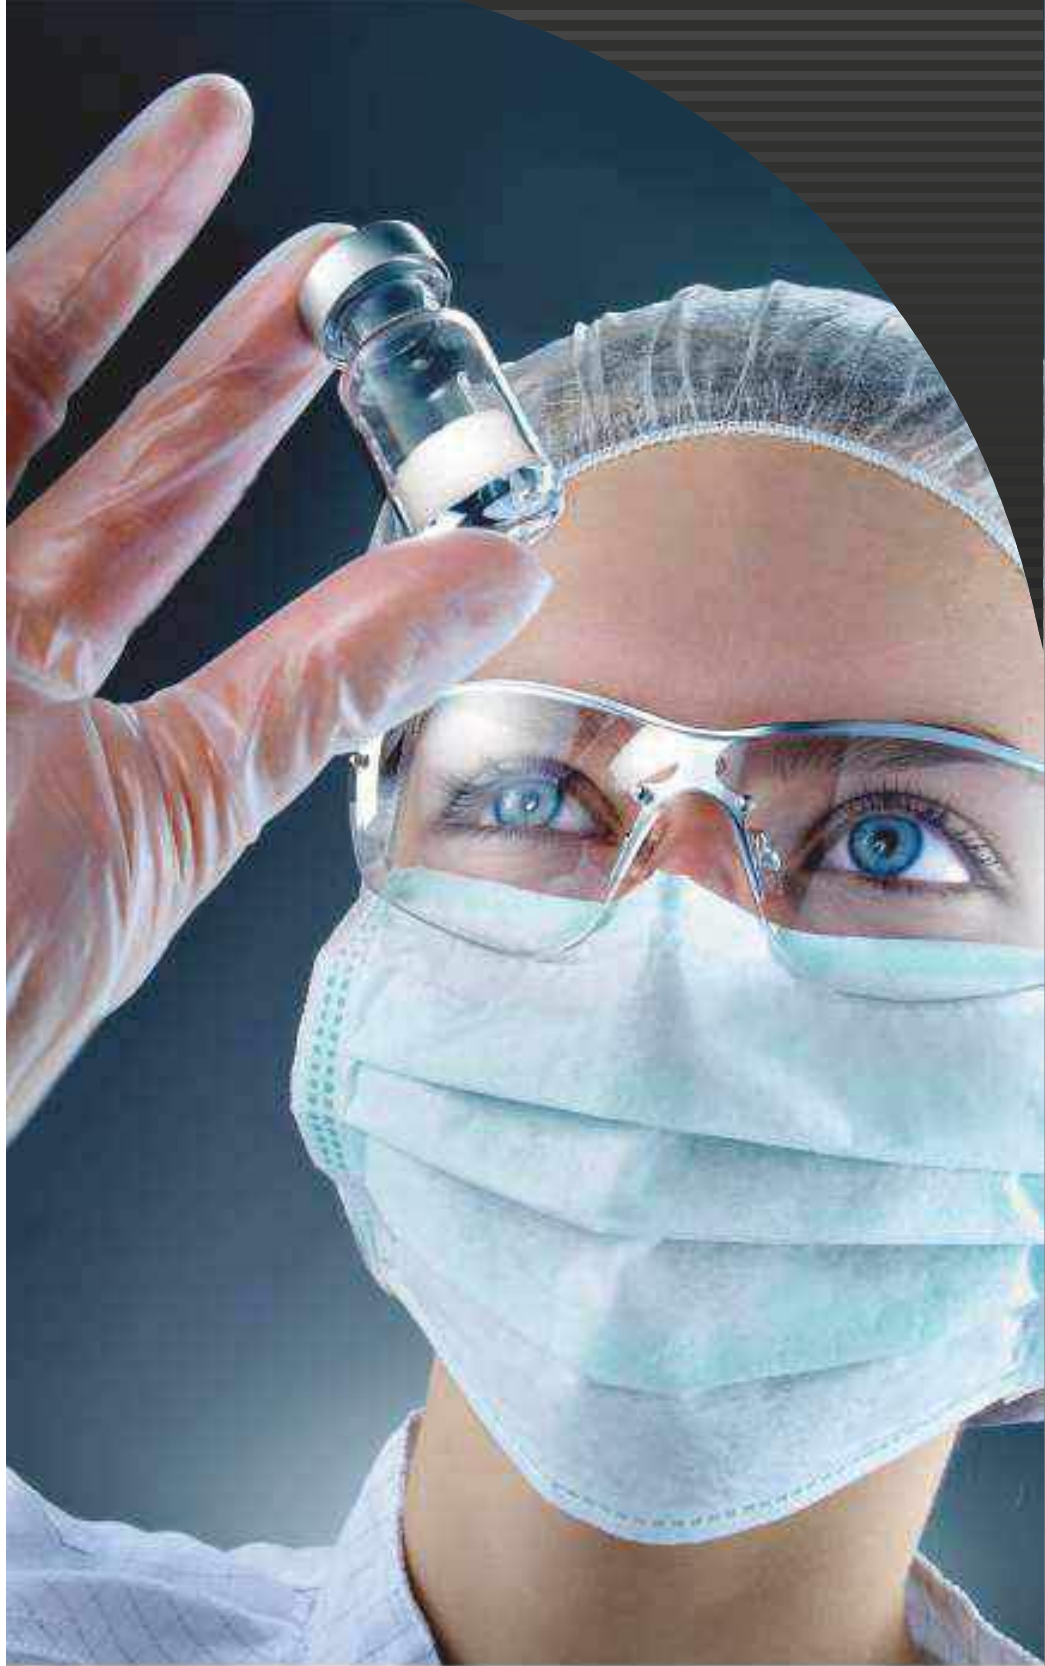

Lyophilization - freeze-drying - is a crucial enabling process technology for many important parenteral drugs. Close to 60 percent of biopharmaceuticals, including enzymes, proteins, hormones and monoclonal antibodies, must be lyophilized as these therapeutic agents are insufficiently stable for ready-to-use solution dosage forms.

In solution, many drug substances are susceptible to even modest changes in temperature and chemical environment. These complex molecules undergo hydrolytic, oxidative, and aggregation reactions, compromising both potency and safety. Consequently, parenterals must often be distributed "cold-chained" - refrigerated or maintained frozen from manufacturing line to patient. Even then, freezing and/or thawing may cause some proteins to aggregate. Lyophilization overcomes poor stability by rendering labile drugs and proteins in a solid form more tolerant of long term product storage.

Lyophilization extends the shelf life of drugs and biologicals, preserving their chemical and biological properties. It involves less cumbersome storage and handling. Lyophilization reduces the temperature requirement for shipping and protects the biologicals' vitality. Compared with other methods, lyophilization dries biologicals at a lower temperature, reducing the damage to the product and retaining the molecular integrity.

Health Biotech Limited (HBL) provides world-class expertise in lyophilization product and process development, and prides itself on consistent delivery of parenteral products as economically and rapidly as possible.

Lyophilization is a costly, complex, facility-intensive operation that many companies do, but few do well. Health Biotech employs scientists rigorously trained in lyophilization science, making us ideally equipped to achieve excellence. Lyophilization process validation at Health Biotech not only includes assurance of meeting all physical and chemical requirements of the lyophilized dosage form, but also includes the maintenance of sterility in transferring product and during the freeze-drying cycle itself. With so many competencies for developing, manufacturing and validating robust lyophilized products, HBL's Contract Manufacturing Services (CMS) have become the avenue of choice for many marketers, both large and small, with developmental, clinical and commercial-stage lyophilization products.

ADVANTAGES OF LYOPHILIZATION

- Product is stored in dry
- Product is dried without elevated temperatures
- It is good for oxygen and air sensitive drugs
- Rapid reconstitution
- Constituents of dried drugs are homogenously dispersed
- Sterility of the product can be achieved and maintained

LYOPHILIZER FEATURES

- 9.5 Sq. Mtr Lyophilizer with capacity of 50000 vials in single batch
- 1.5 Sq. Mtr Lyophilizer with capacity of 5000 vials in one cycle
- Validated and standardized cycles as per product Eutectic temperatures
- Fully automatic process control
- Hydraulic stoppering device
- Clean In Place (CIP) cleaning system
- Steam In Place (SIP)

- Steam sterilization system (D version)
- Vaporized Hydrogen Peroxide (VHP) sterilization system
- Batch loader / un-loader for bulk products in trays
- Loader / un-loader for products in vials without trays
- Systems applying isolator and containment technology
- Products and documentation to meet FDA regulations and in compliance with GLP, cGMP, and GAMP guidelines
